EXPERIENCE

Data Engineer, Scientific Center of Monaco

January 2025 - TODAY

Led data engineering work for a scientific project by designing and creating data workflows, developing data pipelines, documentation, and deploying a web interface as well as establishing settings and support for users; also established the GitHub CSM setup.

Computational Biology PhD, Institut de Biologie du Développement de Marseille

September 2021 - October 2024

Designed and deployed two web platforms end-to-end, covering data collection through visualisation and integration of complex and heterogenous data; databases implementation and administration, establishment of settings and support for users; supervised and trained interns during delivery.

Data Engineer, Institut de Biologie du Développement de Marseille

January 2020 - September 2021

Developed data analysis pipelines and designed and deployed collaborative interactive platforms in a scientific research environment.

EDUCATION

Computational Biology PhD, Aix-Marseille Université

2021 - 2024

Bioinformatics Master, Aix-Marseille Université

2018 - 2020

Software Development and Data Analysis, Databases, ML

Biology Licence, Aix-Marseille Université

2015 - 2018

Biochemistry programme, all specialisations in programming

SKILLS

Programmation

bash, R, Python, SQL, C++, JS, formatting (HTML/CSS)

Project management

Design, development, deployment, documentation, interdisciplinary collaboration, supervising work experience students, report writing, technical support

Tools

Notion, Jira, GitHub, Office, Conda, Docker

Languages

French (Native)
English (Fluent)
German (Scholar)

PUBLICATIONS

ORCID : 0009-0002-8755-5852

EXTRA

Sport

Skydiving - D Licence
Scuba Diving - Level 2
Triathlon, Horse riding

Activities

Web Dev, Photography, Piano, Drums, Saxophone, Sport Bike
